I congratulate all workers and veterans of the air fleet of the Republic of Uzbekistan on their professional holiday!

2021 15 August

Uzbekistan Air Fleet Day is a professional holiday for pilots, aviation engineers and technicians, dispatchers, flight attendants and workers of the entire aviation infrastructure of Uzbekistan!

The history of our country's aviation at all stages was a powerful "engine of progress", embodied advanced scientific achievements, exceptional patriotism, the fruits of colossal labor, perseverance and courage of many generations of aviators. Today, this important holiday unites everyone who lifts aircraft into the sky and ensures their flights on the ground.

On this day, we address special and warm words of gratitude and recognition to aviation veterans who, sparing no effort, and sometimes risking their lives, made an invaluable contribution to the formation and development of the Air Fleet of the Republic of Uzbekistan!

I congratulate all people for whom aviation is not just a word, it is a whole life. I wish that you know neither storms. So that the weather is always flying, and luck always remains on your side. I wish you good health, prosperity, strength for new achievements and success in the implementation of all your plans!

Ilhom Mahkamov Chairman of
«Uzbekistan Airways» JSC Board
