The results of the MRO Middle East 2022 in Dubai

2022 23 February

Uzbekistan Airways Technics, which is the structural unit of JSC Uzbekistan Airways, demonstrated its capabilities in the maintenance and repair of Airbus and Boeing aircraft, including the Dreamliner, at the exhibition MRO Middle East 2022.

Also, within the framework of event an agreement was reached with IAI (Israel Aerospace Industries) to develop a partnership for the joint creation of a line to convert Boeing 767 passenger aircraft into cargo configuration, which is now required in the world market, in the Uzbekistan Airways Technics production areas.

The team held a series of B2B meetings and established contact with leading companies – suppliers of spare parts, who are also interested in cooperation with Uzbekistan.
