5 facts about Airbus A321neo NX

2022 17 March

On February 14, 2022, Uzbekistan Airways received the first aircraft model Airbus A321neo NX, and just recently, on March 7, the second airline of the same model flew a direct flight from Hamburg to Tashkent.

The A321neo NX is an updated version of Airbus’s narrow-fuselage passenger aircraft. Today, the Uzbekistan Airways team prepared 5 facts about the new A321.

1. Economic. Compared to the A320, the A321 airliner consumes 16% less fuel.

2. Mid-range. The maximum range of the aircraft reaches 7400 km.

3. Dimensional. Length of the airliner is 44.5 meters.

4. Roomy. Arrangement A321neo NX designed for 188 passengers: 16 in business class and 172 in economy.

5. Comfortable. Salon of the airliner became wider than previous models, which allowed to increase the size of the seats.
