Uzbekistan Airways launched a new website

2022 20 May

Uzbekistan Airways Joint Stock Company announces the launch of a new version of the website www.uzairways.com. The new version of the site is simple and concise, which allows visitors to quickly study the structure of the main sections and easily find the necessary information already on the home page. The website has become more convenient and intuitive for airline passengers.

When filling in the fields From and Where in Cyrillic, autocorrect works for codes and names of cities in Latin. It is worth noting that the list of cities is ordered and grouped by geographical areas, which makes it easier to find the right direction.

In addition to the informative part, the following services are also available on the site:

• online ticket purchase

• additional services (selection of seats, excess baggage, prize baggage, meals on board)

• online check-in for the flight (only for domestic destinations)

• flight schedule

• check ticket

• online scoreboard

• cargo status (for tracking cargo shipments)
