Uzbekistan Airways business aviation 2022 results

2023 17 January

Uzbekistan Airways over the past two years has expanded the range of services provided in the field of passenger transportation by covering a dynamically developing segment - business aviation. Taking into account the increased demand from passengers for individual and private flights, the airline has entered this segment since 2021 and to this day is actively contributing to the development of business aviation in the Republic of Uzbekistan.

After acquiring the Pilatus PC-24 business jet, in 2022 Uzbekistan Airways successfully began active operation of this aircraft throughout our Republic and beyond its borders in order to meet the demand from the population and representatives of business circles of the Republic of Uzbekistan and neighboring countries.

In 2022, Uzbekistan Airways JSC made more than 100 charter passenger flights on the Pilatus PC-24 aircraft to such cities as: Astana, Almaty, Dushanbe, Ashgabat, Osh, Bishkek, Islamabad, Khujand, Baku, Issyk-Kul, as well as to all operating airports of the Republic of Uzbekistan.

For information the Pilatus PC-24 is a Swiss jet aircraft designed for a comfortable flight of up to 8 passengers over a distance of up to 2500 km.
