New menu on Uzbekistan Airways 44 flights

2023 18 January

The catering service of Uzbekistan Airways informs that starting January 2023, the brand-new in-flight menu is available on 44 international flights of the airline. The new onboard menu is divided into time cycles, each of them has its own menu, which will also be changed depending on the season, flight duration, class of service, departure time and direction.

When creating a new menu, the catering service took into account many nuances: the direction of the flight - Europe or Asia; what is the duration of the flight - 3 hours or more; what time the flight will be operated - early in the morning or at night. It should be noted that the development of the new menu complied with international and local in-flight catering standards.

Today, passengers can independently order special meals on the website www.uzairways.com, when buying tickets at the box office or by calling the call center 48 hours before their flight. This service is free.

On Uzbekistan Airways Express flights, the onboard menu includes a sandwich and water.

On the New York and Tokyo routes, it is also planned to introduce an onboard menu.
