Education at the Training Center

2023 23 March

Training and retraining of specialists in aviation are an important part of maintaining stable and non-stop work. Uzbekistan Airways JSC also performs large-scale work in this direction. Each structural subdivision of the airline conducts scheduled training of its employees. Training Center LLC is no exception. The Center is one of the most important organizations, like others, that contribute to the development and strengthening of the airline's image.

Uzbekistan Airways is working on the training of professional and qualified personnel who are constantly qualified in their field. Pilots and flight attendants are regularly trained, while strengthening their skills and knowledge in aviation.

It is worth noting that from November 14 to November 19, 2022 Training Center LLC sent its instructors to Krasnoyarsk (Russian Federation) to study at the course “Retraining (retraining) of flight attendants to perform flights on ATR 42/72 aircraft” at the private institution of additional professional education “School of Flight Attendants”. We remind you that today Training Center LLC is engaged in training, retraining of pilots and flight attendants, for both foreign and local airlines as Panorama Airways, Qanot Sharq and others.
