Uzbekistan Airways presents an updated series of travel kits in business class

2023 7 April

The environmental component has become one of the main features of the new kits. The airline has decided to reduce the use of plastic items and film. Instead, amenity kits now use items made from recyclable and sustainable materials. This approach will significantly reduce the amount of waste and minimize the negative impact on nature.

Travel sets include hand cream and lip balm by the Portuguese brand Claus Porto. Depending on the duration of the flight, passengers are offered a dental kit, mouthwash, comb, earplugs, a comfortable sleep mask, a branded ballpoint pen, a shoehorn and slippers in individual packaging.

Toothbrush, comb and shoehorn are made of environmentally friendly, natural material - bamboo wood. Teeth cleaning kit and earplugs are presented in kraft paper packaging.

The new sets’ design reflects the national traditions of Uzbekistan, and their size and shape depend on flight duration.

We believe that our travel kits will not only be useful during the flight, but will also remind you of a pleasant journey on our aircrafts’ board.
