

Excursion for pupils at Uzbekistan Airways Technics

2023 16 May

Uzbekistan Airways, together with specialists from Uzbekistan Airways Technics, conducted an excursion for students from the private school "Jalloliddin" at the airline's maintenance base. Uzbekistan Airways, together with specialists from Uzbekistan Airways Technics, conducted an excursion for students from the private school "Jalloliddin" at the airline's maintenance base.

The excursion provided the opportunity for pupils to learn more about the work of technical specialists, as well as to visit the cockpit, where they were shown how to operate an aircraft. Responsible staff members from Uzbekistan Airways Technics willingly shared their knowledge, giving schoolchildren a good idea of working in aviation. Additionally, the pupils were able to learn about the technical and system operations on the very latest models of aircraft.

Our excursion is not only interesting and informative, but such tours also help students get closer to their dreams, and perhaps today's schoolchildren will decide to build their careers in aviation in the future!
