Uzbekistan Airways successfully participates in the exhibition in Paris

2024 18 September

The airline was presented at the international B2B exhibition IFTM 2024 in Paris. On the first day of the event, representatives of the airline actively discussed with foreign partners the prospects of increasing flights connecting European cities with Asia. Special attention was paid to the idea of turning Tashkent into a transit hub for passengers from Europe heading to Asian countries.

Uzbekistan Airways is currently the only airline in Central Asia connecting France with the countries of the region by direct flights from Paris to Tashkent and round trip.

We invite you to visit our stand in one of the largest exhibition centers of Paris – Porte de Versailles. The exhibition will last until September 19.
