

# When Dreams of the Sky Come Closer!

2025 27 May

Today, young children from a local preschool embarked on an exciting educational excursion to explore the helicopters of Uzbekistan Helicopters and an aircraft of Uzbekistan Airways. The little guests had the chance not only to see the aircraft up close, but also to learn how they work, what they're used for, and how helicopters differ from airplanes.

Specialists from Uzbekistan Helicopters explained the technical features of the helicopters and gave a tour of the cockpit — the very place where true aerial adventures begin. Meanwhile, flight attendants from Uzbekistan Airways warmly welcomed the children on board and showed them around the passenger cabin.
