Uzbekistan Airways strengthens partnerships at TTG Travel Experience

2025 10 October

From October 8 to 10, Uzbekistan Airways is participating in the largest tourism exhibition, TTG Travel Experience 2025, in Italy, presenting new opportunities for cooperation with European partners and the development of tourism exchange between Uzbekistan and Italy.

Meetings with leading Italian tour operators were held during the exhibition. The parties discussed plans to launch new flights between the two countries, as well as the use of modern Boeing 787 Dreamliner aircraft on these routes.

Particular attention was paid to strengthening long-term partnerships and developing joint initiatives aimed at increasing tourist flows. The Italian side noted that Uzbekistan is among the ten most popular destinations for Italian travelers and expressed its readiness to promote further growth in interest in the country.

Initiatives to expand the agency network and ticket sales points throughout Italy were also discussed, which will make flights with Uzbekistan Airways even more accessible.

The airline's representative in Italy, Khushnud Artikov, noted that all proposals from partners will be considered as part of the strategy to strengthen Uzbekistan Airways' presence in the European market.

Following the meetings, the parties confirmed their mutual interest in developing tourism ties and further strengthening cooperation. Representatives of the airline also gave interviews to Italian media, talking about plans to expand the route network and promote the Uzbekistan Airways brand in Europe.
