

Uzbekistan Airways at the 2025 Korea Night B2B Travel Connect: Strengthening Ties with the Republic of Korea

2025 28 November

Uzbekistan Airways took an active part in the significant travel industry event — the 2025 Korea Night B2B Travel Connect, organized by the Korean Tourism Organization (KTO).

During the gathering, a stable increase in passenger traffic from Central Asian nations, including Uzbekistan, to the Republic of Korea was noted. Participants conducted a series of negotiations dedicated to pivotal tourism segments, including medical and educational programs, as well as the organization of informative school camps for students during summer recess.

Uzbekistan Airways presented its extensive capabilities in air transportation, alongside the high tourism potential of Uzbekistan. Particular attention was devoted to interline and codeshare flights, which are operated in cooperation with the airline's partners, ensuring convenient worldwide connectivity.

The event featured productive B2B meetings with representatives of leading travel companies. The culminating moment was the raffle for two round-trip air tickets on the Tashkent-Seoul-Tashkent route, which generated significant interest among attendees.

We remind travelers that Uzbekistan Airways operates daily flights on the Tashkent-Seoul-Tashkent route utilizing comfortable Boeing 787 Dreamliner aircraft, offering passengers a high standard of service and reliability.
