Uzbekistan Airways presents updated travel kits for business class passengers

2025 19 December

On the eve of the New Year, Uzbekistan Airways will offer business class passengers updated travel kits, continuing to consistently improve the level of service on board. The new kits are designed with flight comfort, functionality, and modern standards of premium service in mind.

The new travel kits stand out from previous series: they are more thoughtful, practical, and convenient for further use. Functional contents, stylish design, and high-quality materials create a feeling of care and comfort throughout the flight.

The kits are made in a restrained and elegant color scheme: blue and burgundy shades for long-haul flights, gray and black shades for medium-haul routes.

Travel kit contents

Slippers

The slippers are comfortable and functional, with thick soles. Thanks to the high-quality materials, the slippers are not disposable—passengers can take them with them and use them at home or in a hotel.

The slippers come with a practical fabric shoe bag in which passengers can put their shoes, boots, or sneakers. The bag fits conveniently on the luggage rack or under the seat, ensuring order and additional comfort in the cabin.

Sleep mask

The sleep mask has been improved compared to previous versions. The smooth, soft fabric is pleasant to the skin and eyes, while the adjustable elastic band ensures a comfortable fit and reliable protection from light during rest.

Comb

The updated comb is designed as a mini massage brush. It combines compact size with functionality and ease of use on the go.

The set also includes earplugs, a toothbrush and toothpaste set, and skincare products.

Aigner cosmetics

The new travel set features mini versions of Aigner cosmetics. The philosophy of the European brand, founded in Munich in 1965, combines German precision, Italian elegance, and the use of premium ingredients.

Aigner Hand Cream

A light and rich cream for daily care:

- intensively nourishes and softens the skin of the hands;
- protects against dryness and external influences;
- absorbs quickly without leaving a sticky residue;
- ideal for flights and frequent travel.

Aigner Lip Balm

A nourishing product with a comfortable texture:

- moisturizes and nourishes the lips;
- protects against dryness and adverse climatic conditions;
- provides a feeling of comfort and care throughout the day.
