Uzbekistan Airways is participating in one of the largest international tourism exhibitions, FITUR, which is being held in Madrid.

2026 23 January

As part of the exhibition, airline representatives are informing visitors about current fares, route network development, and aviation opportunities. A series of business meetings with representatives of local businesses, travel companies, and partners are also planned, aimed at strengthening cooperation.

Participation in FITUR allows Uzbekistan Airways to promote the country's tourism potential on the international stage, which is in line with the objectives set by the President of the Republic of Uzbekistan.

Regular flights to Madrid will be operated on a weekly basis, every Monday, starting from the spring-summer navigation season.
