Uzbekistan Airways Successfully Completes 10th IOSA Audit (IATA Operational Safety Audit)

2026 1 May

Uzbekistan Airways JSC has successfully passed its 10th IOSA (IATA Operational Safety Audit). The airline first received the IOSA certificate in 2008 and has since confirmed its compliance with international operational safety standards every two years.

The results of the latest audit confirm the airline's steady compliance with international standards and recommended practices in flight safety, as well as the effectiveness of its implemented safety management system.

The consistent successful completion of IOSA audits reflects the systematic approach of Uzbekistan Airways JSC toward maintaining and continuously improving flight safety, operational reliability, and service quality.

The airline will continue to implement its flight safety and quality policy in accordance with international requirements and global industry best practices.
