Employees of Uzbekistan Airways conquered the trails of the Zaamin Ultra international marathon

2026 15 June

The team of the Uzbekistan Airways Joint Stock Company took an active part in one of the most large-scale and prestigious sporting events of the country — the Zaamin Ultra international mountain ultramarathon. The traditional race once again gathered sports enthusiasts and professionals from all over the world, and the representatives of our airline worthily overcame the most complex distances, demonstrating excellent physical conditioning, endurance, and an iron will to achieve victory.

At the extreme distance of 50 kilometers, the airline was represented by Alisher Razhabov, Ibrokhimbek Niyozbekov, and Khojiakbar Makhmudov. The complex mountain terrain and elevation changes did not become an obstacle for our athletes: they successfully finished and took prize-winning places, once again confirming the high level of preparation and the strength of team spirit.

In the 10-kilometer race, an outstanding result was demonstrated by Olga Morozova. She confidently overcame the route and took the honorable fourth place in the absolute standings among all participants of her distance. In turn, the five-kilometer route was successfully completed by Rufina Saifiullina and Feruza Saidkhodzhaeva,

supporting their colleagues with their active participation and aspiration toward a healthy lifestyle.

Participation in such large-scale projects proves that the employees of Uzbekistan Airways are not only professionals in their field but also purpose-driven individuals who set an excellent example for the entire team. We sincerely congratulate our colleagues on their brilliant performance at Zaamin Ultra and wish them the conquest of new peaks — both in sports and in professional activities!
