Uzbekistan Airways and Boeing Present a Boeing 787 Dreamliner Simulator at the Tashkent International Investment Forum

2026 16 June

As part of the 5th Tashkent International Investment Forum, JSC Uzbekistan Airways, in partnership with Boeing, is presenting an interactive zone featuring a Boeing 787 Dreamliner simulator. Forum participants and guests will have the opportunity to experience the role of a pilot and take the controls of one of the world's most advanced passenger aircraft.

The Boeing 787 Dreamliner simulator has been selected for a reason: this aircraft type has been successfully operating within the Uzbekistan Airways fleet for the past ten years. The project reflects the long-standing strategic partnership between Uzbekistan Airways and Boeing, as well as the commitment to the continued development of modern aviation in Uzbekistan.

Today, Uzbekistan Airways is the largest operator of Boeing 787 Dreamliners in Central Asia and continues to modernize its fleet, including through a recently signed agreement for the delivery of 22 additional state-of-the-art Boeing aircraft.

The Tashkent International Investment Forum is one of the leading international platforms for discussing economic development, investment opportunities, and technological cooperation. The forum brings together heads of state, business leaders, investors, and representatives of major global companies.

UZBEKISTAN

Uzbekistan Airways' participation in the forum underscores the national carrier's role in the development of the country's transport infrastructure, the expansion of international cooperation, and the promotion of Uzbekistan's investment potential. The airline's stand serves as a platform to showcase the achievements of Uzbekistan's civil aviation sector, modern technologies, and successful partnerships that contribute to the further development of the nation's aviation industry.
