Attention passengers traveling to India!

2026 26 June

Are you traveling to India? Useful information regarding the rules of entry into the country

India is one of the most vibrant and demanded destinations within our route network. In order for your passing of airport formalities to be rapid and comfortable, Uzbekistan Airways reminds you regarding the current requirements of the aviation and health authorities of the country.

For an unobstructed entry into India, we recommend that all passengers of international flights obtain the following electronic documents well in advance:

1. India Digital Arrival Card (Electronic arrival card): the document is completed online within the period of 72 to 24 hours prior to the scheduled time of departure. You may obtain the card on the official indianvisaonline.gov.in portal.

2. Health declaration (Air Suvidha Self Declaration Form): it is completed no later than 24 hours prior to arrival through the airsuvidha.civilaviation.gov.in portal. Within the form, it is necessary to indicate standard data regarding the state of health, possible contacts, and visited countries over the past 21 days.

Following the successful completion of the questionnaires, we recommend saving the obtained confirmations to a mobile device or printing them out, because they may be requested by officers of the immigration service or of health control upon arrival.

The completion of these simple steps well in advance will assist you in avoiding unnecessary waiting at the airport and commencing the journey exclusively with

positive emotions.

We thank you for the selection of our airline and wish you a pleasant journey!
