

The aviation became even closer!

2026 11 September

The winners of the contest for the young amateurs of the aviation received the long-awaited prize – visited the Training Center of the airline and tried the abilities upon the aviation simulators.

Some of the youths are already preparing to connect the profession with the aviation, some are fond of the history of the aviation or are engaged within the aviation modeling. But one thing unites these individuals – a genuine interest toward the aviation.

And today an opportunity appeared for the guests to take a place within the chair of a pilot, to try to control an aircraft, and to receive completely new impressions.

It seems, exactly such must be the prize for those who genuinely love the aviation.
