

More than three decades of partnership: Uzbekistan Airways signs long-term support agreement

2026 14 September

- Comprehensive component support for Boeing 787 and Airbus A320ceo/neo fleet through 2035
- Supporting the airline's fleet growth and strengthening connectivity across Central Asia

Uzbekistan Airways and Lufthansa Technik have signed a long-term agreement for comprehensive component support services covering the carrier's Boeing 787 Dreamliner and Airbus A320ceo/neo fleets through 2035. The new contract further strengthens a partnership that has successfully spanned more than three decades.

Under the agreement, Lufthansa Technik will provide extensive component pool support and supply services for Uzbekistan Airways' fleet, ensuring rapid access to spare parts and helping maintain high operational reliability and aircraft availability across the airline's network. The long-term collaboration reflects Lufthansa Technik's commitment to supporting the airline's continued expansion and modernization strategy over the next decade.

“Over the past three decades, Lufthansa Technik has proven to be a reliable and trusted partner for Uzbekistan Airways. As demand for air travel continues to grow and Uzbekistan further expands its role as an aviation hub in Central Asia, this agreement provides important support for our fleet modernization and expansion plans. We look forward to continuing our close collaboration and building on the success of our partnership,” **said Shukhrat Khudaykulov, the Chairman of the Board of Uzbekistan Airways.**

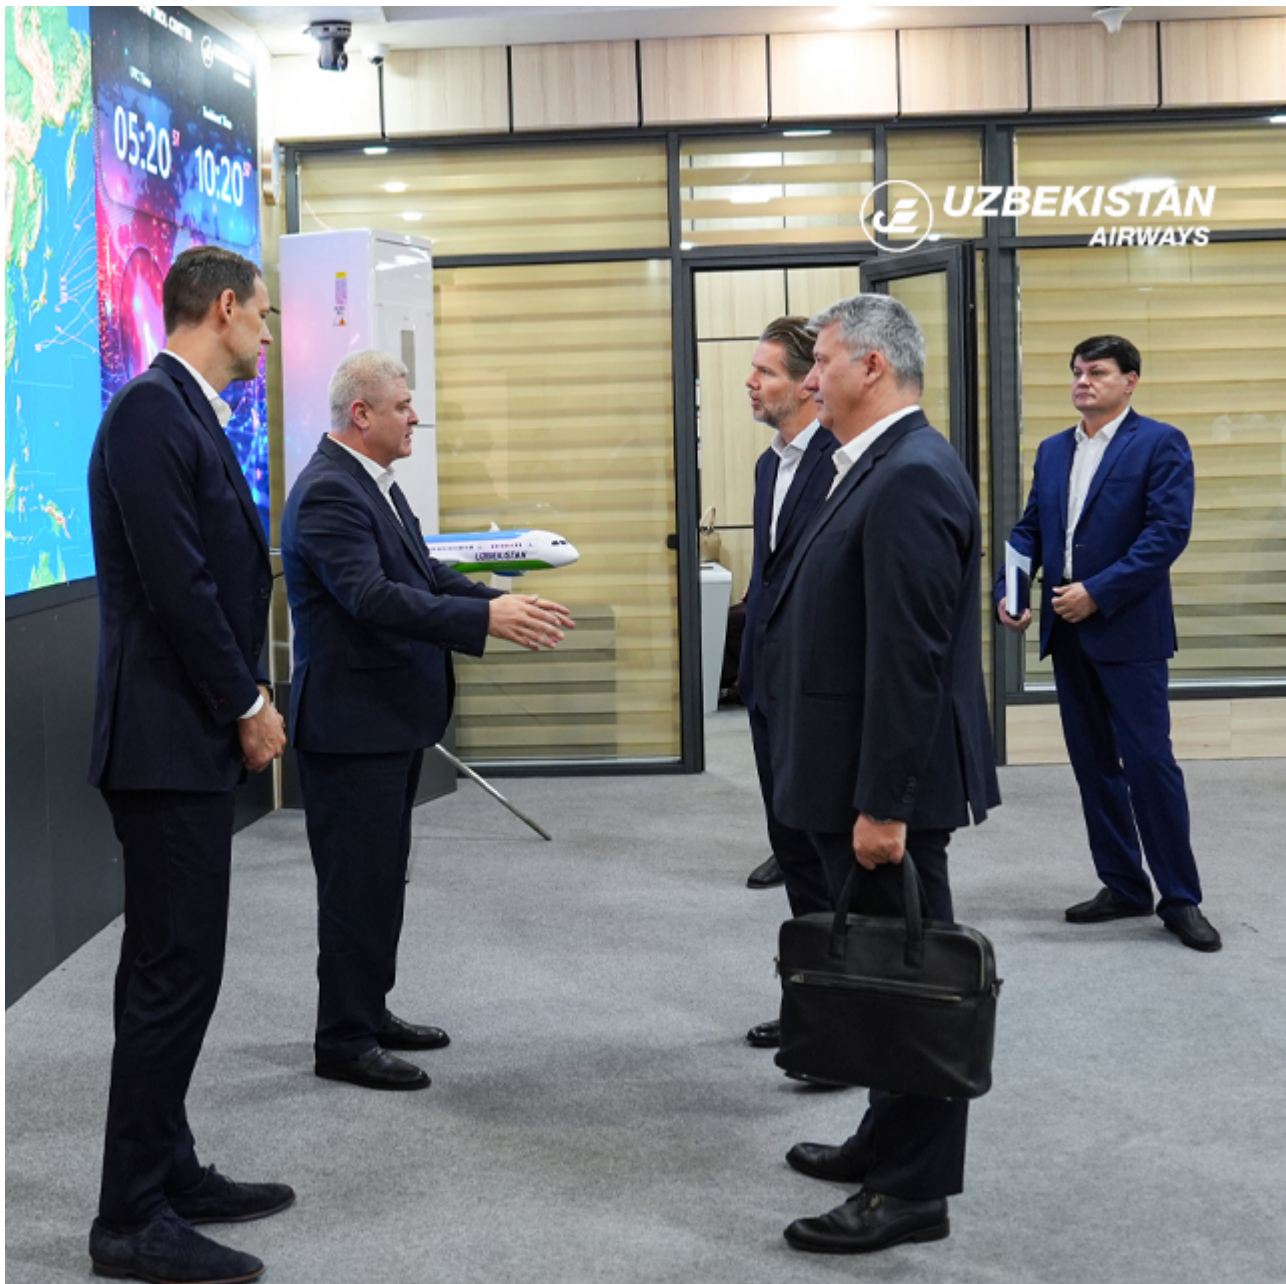

"This agreement reflects the exceptional partnership we have built with Uzbekistan Airways over more than 30 years. Extending our collaboration until 2035 is a strong testament to the mutual trust and fruitful cooperation between our companies. We are proud to continue supporting the airline's Boeing 787 and Airbus A320 fleets as Uzbekistan Airways advances its growth and modernization strategy. Lufthansa Technik remains fully committed to delivering the reliability, expertise and long-term support required for the airline's continued success," **said Dr. Christian Leifeld, Chief Financial Officer of Lufthansa Technik.**

A three-decade partnership

Since the airline added its first Airbus A310-300 to its fleet in 1993, Uzbekistan Airways and Lufthansa Technik have maintained a trusted relationship, built on mutual reliability, technical expertise, and shared commitment to operational excellence. Over the past three decades, Lufthansa Technik has supported the airline's evolving fleet and operational requirements, helping the airline to deliver safe, efficient, and high-quality services across its network.

As Uzbekistan Airways continues to pursue its fleet renewal and growth strategy, the airline is investing in modern, fuel-efficient aircraft to meet increasing demand and further strengthen connectivity between Central Asia, Europe, the Middle East and the Asia-Pacific region.

About Uzbekistan Airways:

Founded in 1992, the national airline Uzbekistan Airways is today the largest carrier in Central Asia. Based in Tashkent, the airline operates flights to more than 100

destinations across Europe, Asia, the Middle East, and North America. Operating a modern fleet of Airbus and Boeing aircraft, including the innovative Boeing 787 Dreamliner, Uzbekistan Airways ensures the highest standards of safety and legendary Uzbek hospitality at every stage of the journey.

About Lufthansa Technik:

The Lufthansa Technik Group is one of the leading providers of technical aircraft services in the world. Certified internationally as maintenance, production and design organization, the company employs around 23,000 people in dozens of locations around the globe.
