Expanding the route network: Uzbekistan Airways will connect Nukus and Atyrau

2026 4 November

Uzbekistan Airways continues to systematically develop the geography of flights and to strengthen the transport accessibility among the regions of Central Asia. Within the framework of the strategy concerning the expansion of the destinations from the regional hubs, we are glad to announce the launch of a new regular flight along the route of Nukus – Atyrau – Nukus.

Atyrau is not merely a unique city upon the Ural River, where Europe and Asia meet, but also an essential industrial and business center of western Kazakhstan. The opening of the direct air connection with Nukus will create maximally comfortable logistical conditions for the passengers, and also will bestow a new impulse toward the development of business partnerships, economic ties, and cultural exchange between our countries. We see great potential within this destination and strive to provide a reliable connection for the representatives of business and tourists.

The first flight along the new route is scheduled for the 29 of November. The flights will operate upon a weekly basis, every Sunday. For the convenient planning of corporate and private journeys, we offer advantageous conditions: the cost of the air ticket begins from 1 453 000 soums.

It is possible to purchase the air tickets right now upon the official website booking.uzairways.com, within our mobile application, within the branch of Uzbekistan Airways Sales, and also among the agents of the airline. With Uzbekistan Airways within any sky – you are at home!
