Environmental responsibility as part of the corporate culture of Uzbekistan Airways

2026 23 November

The development of modern aviation is inextricably linked to care for the environment and adherence to the principles of sustainable development. The team of Uzbekistan Airways, together with the structural divisions of our airline, supported this agenda in practice by organizing a tree-planting campaign as part of the landscaping of the Transportchilar («Транспортники») Park in the Akhangaran District of the Tashkent Region.

UZBEKISTAN
AIRWAYS

The initiative of our employees is aimed at improving the local ecosystem, expanding green public spaces, and creating a comfortable and favorable environment for the residents of the region. The planted young saplings became a practical contribution to the future and a vivid example of the high engagement of the entire team of our group of companies in socially significant projects.

At Uzbekistan Airways, care for nature and social responsibility are important guiding principles of our corporate strategy. We are convinced that large-scale positive changes begin with concrete steps and team synergy, and we continue to systematically support projects aimed at greening and preserving the natural potential of the country.
