New uniform of "Uzbekistan Airways"

2020 13 February

Starting from February 14, 2020, "Uzbekistan Airways" is pleased to present to passengers a new uniform of pilots and flight attendants.

A radical change in the image of flight attendants has occurred for the first time in 15 years. The key colors in the clothes were a shade of dark aquamarine and terracotta. The new set for girls consists of skirts, pants, blouses, which are presented in two colors and a jacket. Jacket lining is made in terracotta color with logo application. For the first time in the history of the airline a short-sleeved dress was introduced into the uniform. Headdress, fabric and leather gloves, fabric elastic band to create hairstyles, name and brand badges, neck scarves in two colors are provided as accessories. The ornament on blouses and neck scarves is made in oriental style. The winter coat-coat has a detachable insulated lining.

The complete set for flight attendants-men is presented by a costume of dark grey color with color trimming dark aquamarine. Shaped caps are made in dark grey color with silver trimming.

For pilots the costumes remained in the same color. There are branded buttons and exclusive men's ties.

The fabric is selected taking into account different climatic conditions that our crews have to live in every day.

Domestic and foreign specialists took part in the project. The selection of fabrics and tailoring of the first batch of the main set was carried out by Turkish "Dress Best Uniforms", which worked with such airlines as Turkish Airlines (partial), Fly Dubai, Albania Airlines, Flynas.

Rapid changes in the life of the air carrier are marked by a change in style of those who work directly with each of you.
