“Uzbekistan Airways” renews flights from Moscow “Domodedovo” Airport

2021 24 May

“Uzbekistan Airways” JSC renews flights from Moscow “Domodedovo” Airport from June 15, 2021.

The decision to renew flights is primarily due to the provision of comfort and an increase in the level of passenger service on the flights of Uzbek airlines.

The partnership between “Uzbekistan Airways” JSC and “Domodedovo” will create favorable conditions for the dynamic development of tourism in Uzbekistan due to the wide geography of flights of the airport's partner airlines and transfer flights.

“Our cooperation will open up new opportunities for passengers to significantly save time and flight costs,” said Akmal Juraev, regional representative of “Uzbekistan Airways” in the Russian Federation.

“We are opening a new page of partnership and aim to use the technologies and competencies of the airport to strengthen the position of “Uzbekistan Airways” in the market. I am sure that the rich history and culture of Uzbekistan will attract the attention of tourists, and the comfort and service on the airline's flights will determine the choice in favor of departure from “Domodedovo”, ”said Andrey Pavlov, Director of Moscow “Domodedovo” Airport.
